Customers are referred to Bailey's Standard Cyclopedia of Horticulture or "Hortus" for additional information regarding species unknown to them. Every item on this list is a worthwhile plant or bulb. Cultural directions supplied on request. Seeds of many items available in season. The proper time for shipment varies over many months with the different bulbs. Some are ripe in late summer and some in winter. Every care is taken to have stock true to name and to assure quality and good condition when shipped. Courteous attention will be given to any complaint if made promptly on receipt of goods, but as success with sub-tropical plants and bulbs depends so much on matters of cultivation, soil conditions, temperature, moisture, shade, etc., I will not be responsible for the results obtained. In no case will I be liable for more than the amount actually paid for the goods. Ask for information about the American Amaryllis Society and its annual Year Book.
